Undergraduate Student at SIT | BEng Robotics System
Singapore

Summary

Passionate about using technology and data to drive innovation and solve business related problems. Currently using technology to create AI to make a impact in the world. I specialize in Data Analytics as well as Robotics Systems.

My current degree scope is helping me broaden the future of AI and the possibilities of what the future of AI holds and i do hope to help companies or even the community to get better with Robots and AI(s) once i have graduated from my course of study.

My past diploma scope includes Data Analytics, coding websites while implementing business aspects to it, such as how the way pages are designed to attract customers, the way we communicate with our target audience.
